

VaultCatManager

netvision enables you to manage CATIA® files in Autodesk Vault®.

netvision VaultCatManager enables users to manage complete CATIA® product structures within the Autodesk Vault® product family in an easy, quick and effective way. VaultCatManager is fully integrated into the Vault® user interface. The file management is identical to the workflow using Inventor® files. All important commands, like checkin and checkout, etc., can be executed either from Vault® Explorer or from within the CATIA® user interface. All Vault® product workflows are fully available for the management of CATIA® files. Attached documents, like PDF files, can be created based on the usual document workflow.

System requirements:

Supported Vault releases:

- Autodesk Vault Workgroup 2013, 2014, 2015, 2016 and 2017
- Autodesk Vault Professional 2013, 2014, 2015, 2016 and 2017

Supported operating systems:

- Windows Server 2003, 2008, 2008R2 and 2012
- Windows 10, 8/8.1, 7 und Vista

Also perfect for migration projects

The extensive import capabilities of the netvision VAULT CAT Manager enable you to migrate complete CATIA® structures, including all references, into Autodesk Vault®. Via the application integration you can takeover assemblies and components into Autodesk Inventor® as well.
