

VaultBomExtractor

netvision provides a reliable way to create bills of materials.

Do you need automatic extraction of bills of materials inside Autodesk Vault? Do you want to automate the creation of bills of materials tables during workflow changes? Do your designers spend too much time compiling bills of materials for a specific assembly?

netvision offers the solution!

The netvision VaultBomExtractor takes you up on your challenges. The bills of materials can be created automatically by the jobserver or manually at any time. All functions are tightly integrated into the Vault user interface.

System requirements:

Supported Vault Releases:

- Autodesk Vault® Workgroup 2013, 2014, 2015, 2016 und 2017
- Autodesk Vault® Professional 2013, 2014, 2015, 2016 und 2017

Supported Operating Systems:

- Windows® Server 2003, 2008, 2008R2 und 2012
- Windows® 10, 8/8.1, 7, XP und Vista

Flexible and extendable

VaultBomExtractor enables users to extend its functionality by user defined scripts. Using IronPython, a .NET based scripting language, users can add any required function. Typical Vault actions can be fully automated. Settings regarding the export of bills of materials, storage paths, etc. can easily be adjusted via the system configuration. In larger environments the settings can be transferred using an XML document.

netvision-VaultBomExtractor creates BOM efficiently.

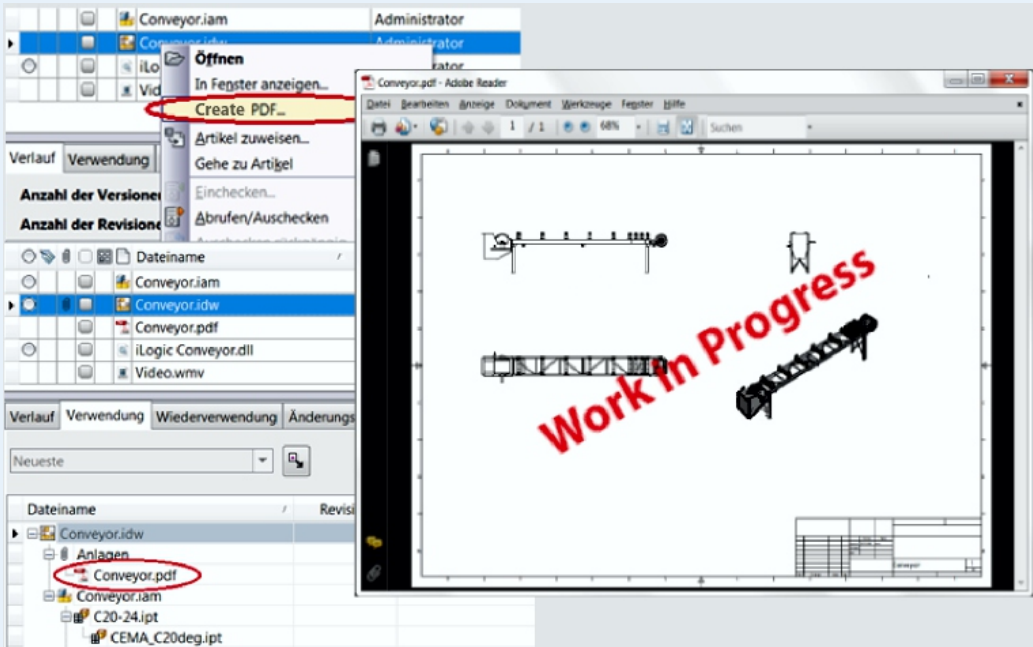

Automated extraction of bills of materials

BOM-Creation:

- Create an Excel-Table for each assembly and sub-assembly
- Create one Excel-Table for the entire assembly
- Preview Excel-Tables inside Vault without having Excel installed
- Create user-defined columns for each configuration
- Filter by user-defined column filters and search terms
- Export Excel-Tables

Predefined Jobs (Jobserver and/or manual):

- Creation of BOMs based on Vault workflows (for ex. Release)
- Creation of all BOMs inside a Vault folder
- Creation of all BOMs for a complete assembly
- Copy BOMs to external folder

Workgroup functionality:

- Automated e-mails for IT-Administrators (e.g. Error reports)
- Automated e-mails including attachments based on workflows

Installation and Configuration:

- GUI-based configuration
- XML deployment for large environments

VaultBomExtractor - Modules:

VaultBomExtractor Server license	1.690,00 EURO
VaultBomExtractor Client license	349,00 EURO
